Strengthening Tomorrow

About us

Who We Are

XINDUX® is a leading provider of electrical management and customized solutions for industrial and automation applications. We are committed to providing our customers with the highest quality products and services, and we are constantly innovating to develop new and better solutions. We are also committed to sustainability, and we are working to reduce our environmental impact.

Vision

To empower the world with innovative electrical solutions that transform the way we live and work.

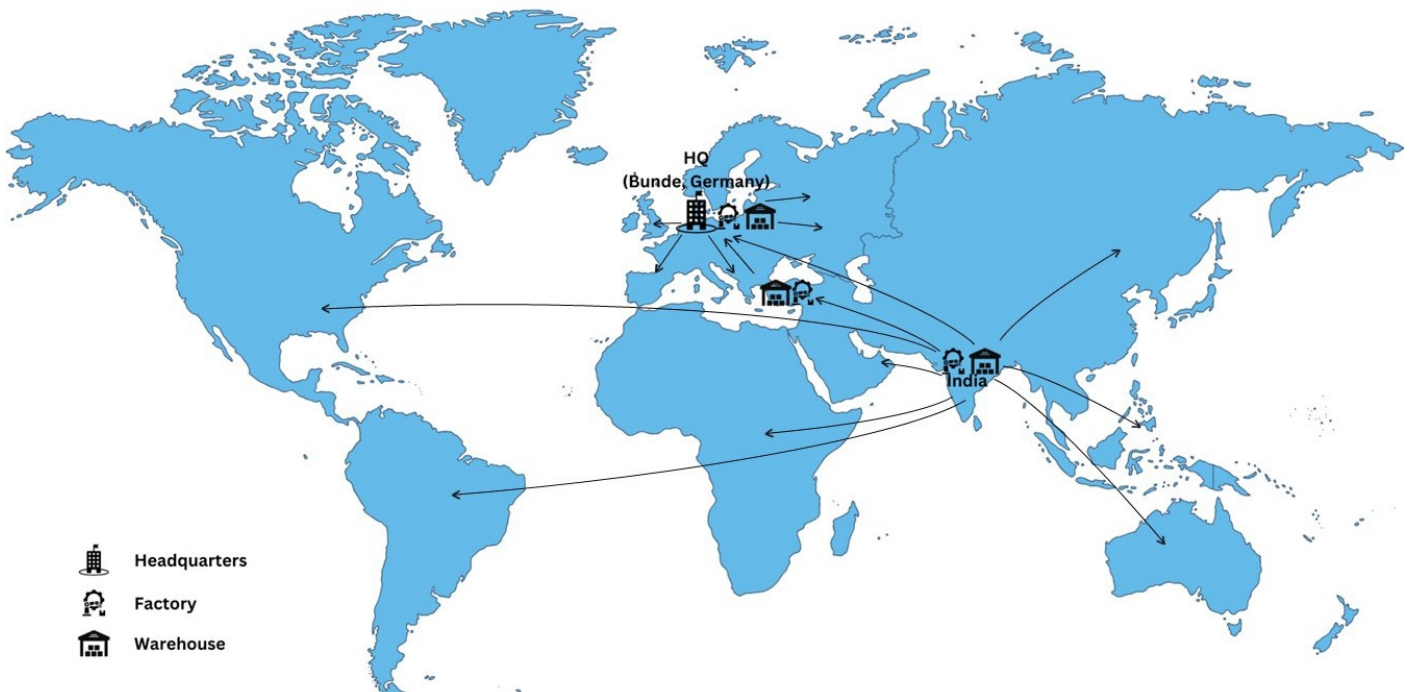

Mission

We are committed to delivering an extraordinary experience for our customers by being proactive, solution-oriented, and collaborative.

OUR VALUES

- X -Xcellence in Industrial Solutions
- I -Innovative Partnerships
- N -Navigating Complex Challenges
- D -Dedication to Service
- U -Uniting for Integrity
- X -Xceptional Customer Support

Our Solutions

Quality

In addition to a global presence, as a traditional German company, XINDUX® products and solutions are manufactured, complying with the most stringent quality standards. XINDUX® is committed to delivering high-quality products to their customers and our products are certified by international standards, such as ATEX, IECEx, UL, CE or RoHS.

A key element in the area of social responsibility is our commitment to conduct business in a manner that protects the natural and social environment, ensures safety at workplace, and promotes comprehensive occupational health standards among our employees.

Because of our global footprint, XINDUX® continues to learn and adapt world class QHSE standards and continues to adhere to international norms. This is done by creating awareness about quality, health and safety issues; ensuring our personnel are well-informed and up-to-date on care and protection methods as well as risk management options. XINDUX® invests in employee training and development to ensure that their staff is well-equipped to handle quality control tasks and enhances their expertise in quality assurance.

Our QHSE department ensures that all training, inspections and audits are carried out regularly and in accordance with the strictest requirements. XINDUX® has a comprehensive quality assurance process and uses state-of-the-art technology and advanced equipment for testing and monitoring to ensure consistent high quality output.

XINDUX® focuses on extra ordinary commitment towards our stake holders, both internal and external. We strive for the highest quality standards, comprehensive occupational safety as well as environmental and health protection by aligning our operational goals with our organizational goal.

Capabilities

We are pioneers in die-casting, sheet moulding, machining, stamping, turning, assemblies, and several other activities related to electrical, automation, and related industries. We have global supply chain with warehousing capabilities. We also have provisions to stock locally for a quick turnaround time.

Customised Solutions

Ideas to Conception & Implementation

Raw Materials Processed

- Steel
- Stainless Steel
- Brass
- Aluminium
- Copper
- Beryllium
- Zinc
- Cast Iron
- Gun Metal
- Phosphor Bronze
- Nickel
- Inconel

Manufacturing Equipment

- Single spindle CNC turning
- VMC with 5 axis & HMC with pallet changers
- Multi spindle (6-8) machine
- CNC cylindrical grinding
- Integrated turning and milling centers (Turn O Mill)
- Rotary transfer machine with 8 operations
- Conventional set up with: Lathe, Milling, Drilling, Grinding, Thread rolling etc.
- Automated in-house component cleaning

Secondary Processes

- Assembly and sub assemblies
- Acid- Alkaline cleaning bath
- Circular saw Cutting machine
- Drill tap Centers Super Finishing: Lapping machine, Buffing, Burnishing, Honing etc.
- Broaching machine
- Shot blasting & Deflashing, Vibratory deburring and finishing machine
- Gun drilling
- Welding and Brazing
- Liquid & Gas Nitriding

Treatment Facilities

- Heat Treatment:
 - Vacuum hardening with sub zero treatment
 - Nitro carburizing
 - Quench Polish Quench (QPQ) process
- Surface Treatment:
 - Anodizing
 - Mech. Zinc plating
 - Geomet
 - Dacrometing
 - Hard chrome plating
 - Liquid painting phosphating
 - Powder Coating
 - Zinc Plating

Production Capabilities

CNC MACHINING			
Machine Name	CAPACITY		No. of machines

Inspection & QA

- 3D Vision Measurement System (VMS)
- Coordinate Measurement Machine (CMM)
- Surface roughness tester
- Hardness tester
- Coating thickness tester
- Tensile testing machine
- Air gauge
- Standard PIN set from 0.5 to 20 mm in least count of 0.01 mm
- Slip gauge sets
- Digimatic height gauge
- Special Purpose gauges

Machined & Turned Parts

XINDUX® has capabilities to conceptualize exact specifications of the customers and translate it into a product. We are flexible in taking a small batch and ensure we deliver the products with a quick turnaround time.

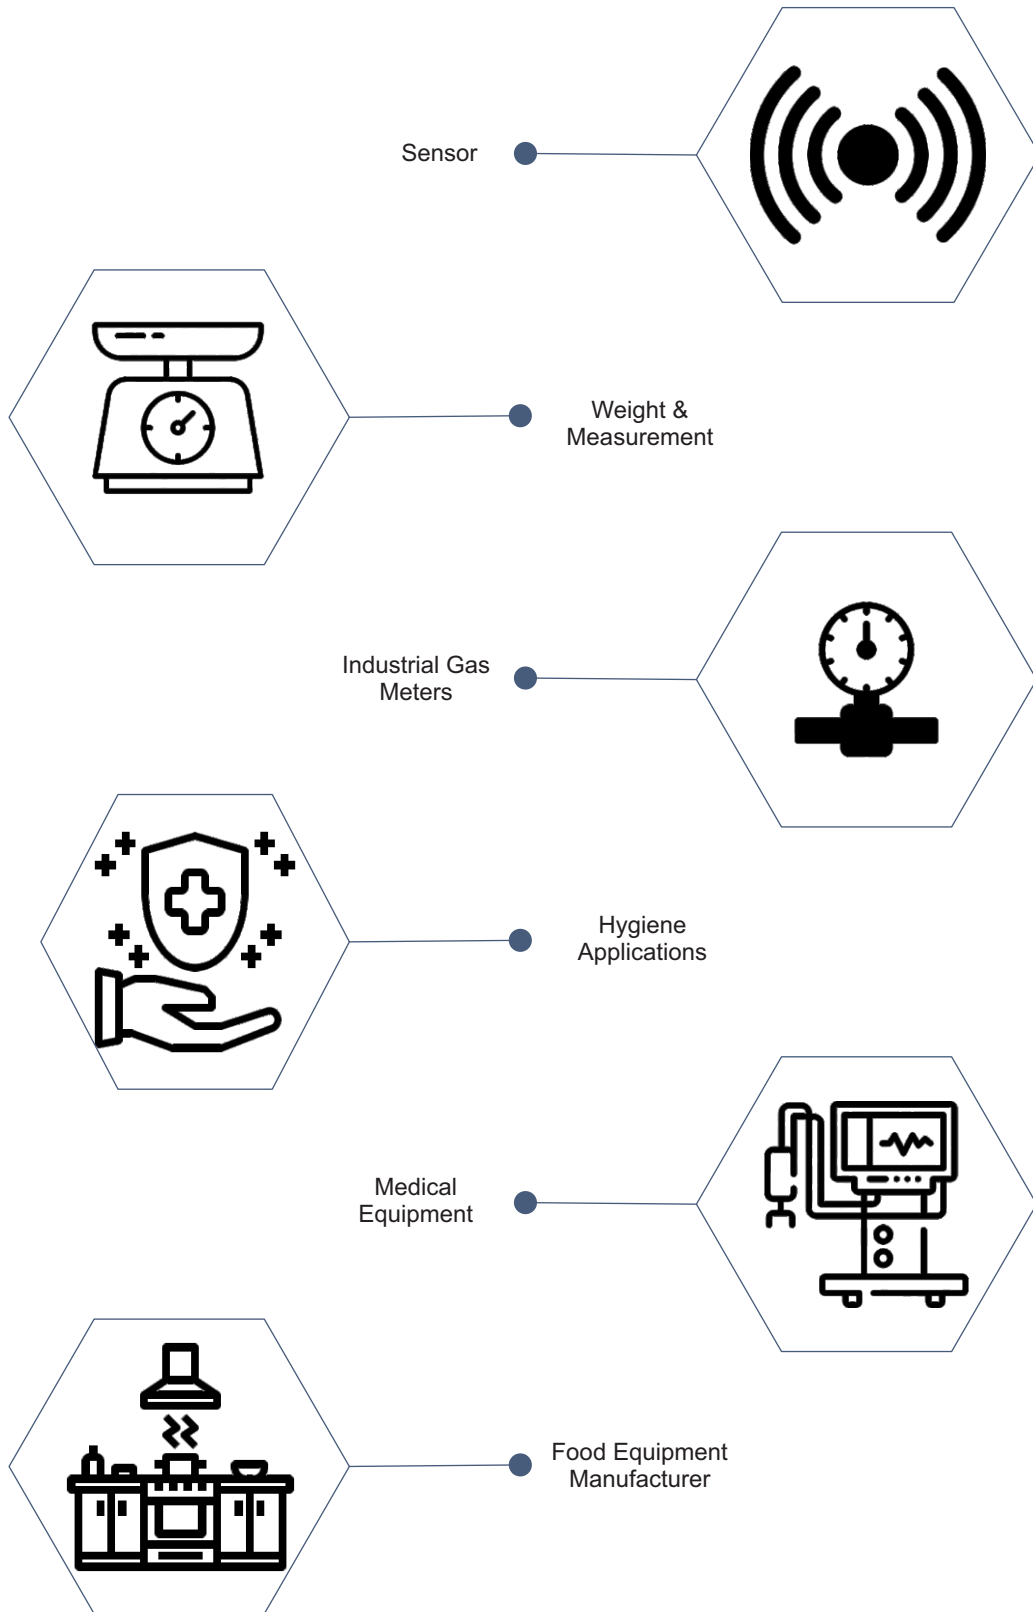

Die Cast Parts

XINDUX® has developed expertise across various forms of castings across a wide array of metals. It can also support tool design in addition to manufacturing. Some of the parts can be powder coated depending upon the application. The parts are used in various applications like electrical, instrumentation, motors, appliances, power tools, etc.

Industries We Serve

Enclosures

XINDUX® offers industrial as well as explosion proof enclosures made of different materials aluminum, polyester, ABS, polycarbonate, stainless steel, and sheet steel and protects your installations from dust and water with a protection class up to IP69

Aluminum Enclosures

Stainless Steel Enclosures V2A

Polyester Enclosures

Stainless Steel Enclosures V4A

Thermoplastic Enclosures

High Voltage Enclosures

EX Aluminum Enclosures

Sheet Steel Enclosures

EX Polyester Enclosures

Aluminum Enclosure

Technical Characteristics:

- Aluminum alloy AlSi 12 according to DIN EN 1706
- High corrosion resistance
- Protection classes IP66 / IP67 / IP68 / IP69 according to DIN EN 60529
- NEMA 4X and 6P
- Impact resistance Ik09
- Captive cover screws made of stainless steel 1.4301 (A2)
- Seal made of neoprene (-40°C to + 110°C) or optional seal made of silicone (-50°C to + 135°C)
- EMC housing with conductive seal on request
- Fastening thread M4 / M6 in the base bars to accommodate e.g. circuit boards
- Salt spray test according to DIN EN 9227 completed
- Shock and vibration test completed successfully
- For accessories refer page no. 21

Polyester Enclosures

Technical characteristics

- Glass fiber Reinforced Polyester in the colors RAL7000 (gray) or RAL9011 (black)
- Protection class IP66, IP67, IP68 according to DIN EN 60529
- Shock resistance: 7 joules according to EN 60079-0
- Surface resistance: 10^{12} Ohm / Black: $<10^9$ Ohm
- Flammability: V0, self-extinguishing, UL94
- Dielectric strength: 18kV / mm
- Temperature range: -60°C to + 165°C
- Captive cover screws made of stainless steel 1.4301 (A2)
- Neoprene, foamed PUR seal or optional silicone round cord
- Fastening thread M4 / M6 in the base bars to accommodate e.g. Circuit boards or a mounting plate
- For accessories refer page no. 21

Stainless Steel Enclosures V2A

Technical characteristics:

- Stainless steel material 1.4301 / 304
- Material thickness: 1.25mm or 1.5mm
- Sanded surface (grain: 240)
- Other surfaces on request
- Protection classes IP66 / IP67 / IP68 / IP69 according to DIN EN 60529
- Lid seal made of silicone
- captive cover screws made of stainless steel 1.4301 (A2)
- Temperature range: -40°C to + 80°C
- Available as an explosion-proof variant
- Threaded holes on the bottom of the case for the installation of e.g. Mounting rails or boards
- For accessories refer page no. 21

Stainless Steel Enclosures V4A

Technical characteristics:

- Stainless steel material 1.4404 / 316L
- Material thickness: 1.5mm or 2.0mm
- Surface orbital (standard)
- On request surface electro polished, glass bead blasted or lacquered / coated
- Protection class IP66, IP67, IP68 according to DIN EN 60529 (IP66 = standard)
- EX housing: available as empty or terminal enclosures up to 4 flange plates
- Internal / external earthing spigot M10
- Welded wall mounting brackets
- Heavy-duty hinges from size GB4S0168218130
- Padlock door lock for cabinets with hinged doors
- Fire protection enclosures up to 970°C
- Ex high voltage enclosures up to 15KV
- Special sizes possible on request
- For accessories refer page no. 21

High Voltage Enclosures

Technical characteristics & accessories:

- Stainless steel material 1.4404 / 316L
- Material thickness 2mm or 3mm depending on the size
- Surface orbital
- On request surface electropolished, sandblasted or painted according to customer specifications
- Protection class IP66 as standard, IP67 / IP68 on request
- According to ATEX 2014/34 / EU directive Exe, ExnA certification and a temperature classification from T4 to T6
- Temperature ranges:
 - o-20°C to +80°C with neoprene seal
 - o-55°C to +120°C with silicone seal
- Ambient temperature: -50°C to + 55°C
- Flange plates in 3mm to 6mm material thickness on the bottom and / or top of the housing
- Internal / external earthing spigot M10
- Welded wall mounting brackets
- Heavy duty hinges
- Anti-condensation heaters
- Ventilation elements
- Separate compartment for fiber optic cables
- Air purge (Exp)
- Special sizes possible on request
- For accessories refer page no. 21

Thermoplastic Enclosures

Technical Specification:

- GBM (polycarbonate) and GBT (ABS) are available
- Standard color: RAL7035 (light gray)
- Special colors by coloring the material are possible on request for large quantities
- Foamed PUR seal, neoprene or silicone round cord
- Protection class of the housing IP65 according to DIN EN 60529
- Captive lid quick-release screws made of stainless steel
- Temperature ranges:
- o-40°C to + 80°C (GBT) / -40°C to + 120°C (GBM)
- Direct mounting option through cams in the bottom of the housing
- For accessories refer page no. 21

Ex Aluminium Enclosures

Technical characteristics:

- Powder-coated surface in RAL7001
- Protection class IP66 according to DIN EN 60529
- Empty housing with component certificate "U"
- Terminal housing with device certificate "X"
- Suitable for Ex zones: 1/2/21/22
- Available as Ex e (increased safety) or as Ex i (intrinsic safety) aluminum housing
- ATEX or IECEx certification
- Impact resistance: > 7 joules
- Operating temperature: max. -55°C to + 135°C
- For accessories refer page no. 21

Ex Polyester Enclosures

Technical Specification:

- Material colored in RAL7000 or RAL9005
- Protection class IP66 according to DIN EN 60529
- Empty enclosures with component certificate "U"
- Terminal enclosures with device certificate "X"
- Suitable for Ex zones: 1 / 2 / 21 / 22
- Available as Ex e (increased safety) or as Ex i (intrinsic safety) polyester enclosures
- ATEX or IECEx certification
- Surface resistance RAL9005 material: <math><109\ \Omega</math>
- Operating temperature: max. -55°C to +135°C
- Polyester enclosures in gray = suffix G after article no.
- Polyester enclosures in black = suffix S behind article no.
- For accessories refer page no. 21

Sheet Steel Enclosures

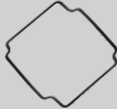

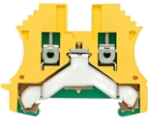

Technical characteristics:

- Material: sheet steel
- Material thickness: 1.25mm
- Powder-coated surface in RAL7035
- All-round foamed-in PU seal
- Protection class: IP66 / NEMA 4
- Perfect protection through multi-edged enclosures protection channel
- Easy wall mounting through rear wall with holes, prepared for wall mounting bracket or direct mounting
- Alternative version with flange plate, protection class: IP55
- Enclosures sizes marked with * are available with a flange
- Flexible interior design thanks to integrated perforated system strips in a 12.5 mm grid
- Protective conductor connection possible in the cover and all four corners of the enclosures
- Accessories such as B. Wall mounting brackets, cover hinges, mounting plate, support rail available on request
- For accessories refer page no. 21

Accessories

	Type of Gland
	Alternatively sealable or hexagon socket cover screws
	Lid seal optionally as silicone / EMC seal
	Support rail 15mm steel, galvanized
	Support rail 32mm steel, galvanized
	Support rail 35mm steel, galvanized
	Sheet steel mounting plate, galvanized
	External joints die-cast aluminum
	Inner joints stainless steel A2
	Terminal block manufacturer of your choice
	Cable glands M12 to M63
	Wall brackets M4 / M6, steel, galvanized
	External earthing M4 / M6, stainless steel

Cable Glands

XINDUX® offers a large portfolio of cable glands & various accessories for industrial and ATEX applications with a very high-quality material and innovative technology. Offerings are in different materials categories- metal and plastics.

- Cable glands Common sizes M16, M20, M25, M32, M40, M50, M63 and other sizes
- Materials: metal (brass/stainless steel) and plastic (polyamide)
- Compliant: RoHS and REACH / SVHC compliant
- UL and ATEX Approved.
- Outdoor resistant polyamide according to UL 746C f1
- Protection class IP 66, IP 68 up to 10 bar and IP 69K according to DIN EN 60529
- Quick mounting and optimum shield connection.

Ventilation Glands & Plugs

Plastic Cable Glands

- Cap nut : Polyamide PA6 V2 / V2 + 30% GF / V0-UL94
- Sealing ring : TPV / with special seal for multi / flat cables
- Gland body : Polyamide PA6 V2 / V0-UL94
- Connection thread : Metric (EN 60423) / PG (DIN 40430)
- Protection class : IP68 5 bar (with O-ring) / IP 54 (for DIN type)
- Temperature range : 20 °C +100 °C -30 °C +150 °C
- Properties : Antivibration protection
: UV resistance (on request)
: Easy to assemble
: Halogen free
: Check fire protection class V0 as per UL94
: Check special seal (dust resistance / multi / flat cables)

Ventilation Glands & Plugs

- Cap nut : Polyamid PA6 V2 / Nickel Plated Brass, Stainless Steel (AISI303/316L)
- Sealing ring : TPV
- Gland body : Polyamid PA6 V2 / Nickel Plated Brass, Stainless Steel (AISI303/316L)
- O-ring : NBR / EPDM
- Vent Part : Acrylic Co-Polymer on Nylon Support (Hydrophobic - Oleophobic)
- Connection thread : Metric (EN 60423), PG (DIN 40430)
- Protection class : IP68
- Temperature range : -20 °C +100 °C / -40 +150 °C
- Benefits : Balance the pressure inside and outside of your systems
: Prevents corrosion and water condensation inside the enclosure
: It gives a huge advantage to be used as cable gland and venting element
: Extend the lifetime of your product
: Highest air flow level
: Anti-vibration protection
: UV resistance (on request)
: Easy to assemble
: Halogen Free
: High strain relief and chemical resistance

Cable Entry System

This includes all round and rectangular separable cables entry systems. The separable frame and the separable core ease the need for the shear cable and the rewiring of the cable with the connector. The cable quality is therefore maintained.

A closed cable is introduced into the upper and lower part of the frame to create high contact pressure on the core and wire. In most cases, the cable allows for stress relief, with protection class IP54.

Features:

- IP54-IP68
- Integrated design with metal or plastic skeleton reinforcement
- Easy for installation without using extra sealing or washer
- Cable entry system for routing various cables, provide sealing for wide range of cable
- Applicable to Type B/C/H in term of wall thickness
- RoHS & Reach compliance
- Excellent climate resistance, UV protection and Ozone resistance

Separable System

Maintenance on the reserved connector cable

Quick and easy installation

High-density cable, a wide variety

Protection class IP54
Fully meet the requirements of general application scenarios

Cable Entry System

Cable Entry Plates-Square type with multi-hole [IP66 / IP67]

- Material: Zinc Plated, Stainless steel, Aluminum
- Elastomer: Synthetic rubber
- Working Temp: -40°C to + 100°C
- Flammability Rating : UL94-V0

Perforated circular sealing threading plate [IP66 / IP68]

- Material: PA (For Thread Version), Zinc Plated, Stainless steel, Aluminum (For Flange Version)
- Elastomer: Synthetic rubber
- Working Temp.: -40°C to + 100°C
- Flammability Rating: UL94-V0

Cable Entry Grommets (Cone shape [IP66 / IP68] / Clamping Type [IP 67])

- Material: PA (For Thread Version), Zinc Plated, Stainless steel, Aluminum (For Flange Version)
- Elastomer: Synthetic rubber
- Working Temp.: -40°C to + 100°C
- Flammability Rating: UL94-V0

Single hole threading sheath (threading sheath / flexible pipe sheath) [IP 67]

- Material: PA (For Thread Version), Zinc Plated, Stainless steel, Aluminum (For Flange Version)
- Elastomer: Synthetic rubber
- Working Temp.: -40°C to + 100°C
- Flammability Rating: UL94-V0

SSF 6 Standard Sealing Frame

- Material: Polyamide
- IP Rating: IP54 / IP65
- Working Temp.: -40°C to + 120°C (static)
- Properties: Halogen free
- Flammability Rating : UL94-V0
- Frame Depth: 17mm

SSF 10 Standard Sealing Frame

- Material: Polyamide
- IP Rating: IP54 / IP65
- Working Temp.: -40°C to + 120°C (static)
- Properties: Halogen free
- Flammability Rating : UL94-V0
- Frame Depth: 17mm

Cable Entry System

SSSF 16 Standard Sealing Frame

- Material: Polyamide
- IP Rating: IP54 / IP65
- Working Temp.: -40°C to + 120°C (static)
- Properties: Halogen free
- Flammability Rating : UL94-V0
- Frame Depth: 17mm

SSSF 24 Standard Sealing Frame

- Material: Polyamide
- IP Rating: IP54 / IP65
- Working Temp.: -40°C to + 120°C (static)
- Properties: Halogen free
- Flammability Rating : UL94-V0
- Frame Depth: 17mm

SSSF 24 Standard Sealing Frame

- Material: Polyamide
- IP Rating: IP54 / IP65
- Working Temp.: -40°C to + 120°C (static)
- Properties: Halogen free
- Flammability Rating : UL94-V0
- Frame Depth: 17mm

FLSF 24 Four Layer Sealing Frame

- Material: Polyamide
- IP Rating: IP54 / IP65
- Working Temp.: -40°C to + 120°C (static)
- Properties: Halogen free
- Flammability Rating : UL94-V0
- Frame Depth: 17mm

SLSF 24 Six Layer Sealing Frame

- Material: Polyamide
- IP Rating: IP54 / IP65
- Working Temp.: -40°C to + 120°C (static)
- Properties: Halogen free
- Flammability Rating : UL94-V0
- Frame Depth: 17mm

OLSF Single Layer Sealing Frame

- Material: Polyamide
- IP Rating: IP54 / IP65
- Working Temp.: -40°C to + 120°C (static)
- Properties: Halogen free
- Flammability Rating : UL94-V0
- Frame Depth: 17mm

Cable Entry System

- TM Small module**
- Material: Synthetic rubber
 - IP Rating: IP54 / IP65
 - Working Temp.: -40°C to + 120°C (static)
 - Properties: Halogen free
 - Flammability Rating : UL94-V0
 - Grommet blind

- TM Medium module**
- Material: Synthetic rubber

Conduits

XINDUX® offers a large portfolio of cable conduits & various accessories for diverse applications with a very high-quality material and in various sizes. Offerings are in different materials categories- metal and plastics.

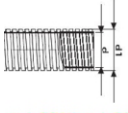

Metal Conduits: Experience robust protection with our metal conduits, ideal for environments that demand strength and durability, ensuring a reliable and secure setup.

Plastic Conduits: Our versatile plastic conduits offer flexibility and ease of installation, delivering a high-quality, cost-effective solution for a variety of applications.

Discover the XINDUX® difference, where superior protection meets innovative design

Cable Lugs

XINDUX® offers you a wide range of insulated and non-insulated cable lugs and connectors which guarantees a consistent electrical connection quality over a prolonged period.

XINDUX® stocks a comprehensive range of cable lugs, used to terminate, or connect cables which offer seamless performance connecting cables, electrical appliances and other power mechanisms, for harsh-duty environments

Cable Lugs

	Type	Material	Cable mm ²	Stud Hole Size	Certification	Features
	Standard Range Cable Lugs	Electrolytic Copper	1.5 mm ² to 1000 mm ²	4.2 mm to 21 mm	 Up to 630 mm ²	<ul style="list-style-type: none"> - Tin plated for good conductivity and avoid oxidation of copper - Annealed material optimizes material and crimping properties
	Light Duty Cable Lugs	Electrolytic Copper	35 mm ² to 800 mm ²	6.5 mm to 21 mm	 Up to 630 mm ²	<ul style="list-style-type: none"> - Tin plated for good conductivity and avoid oxidation of copper - Annealed material optimizes material and crimping properties
	Bell Mouth Cable Lugs	Electrolytic Copper	10 mm ² to 250 mm ²	5.2 mm to 21 mm		<ul style="list-style-type: none"> - Tin plated for good conductivity and avoid oxidation of copper - Annealed material optimizes material and crimping properties - Easy insertion for cables
	Four Hole Transformer Cable Lugs	Electrolytic Copper	400 mm ² to 800 mm ²	10.5 mm to 21 mm		<ul style="list-style-type: none"> - Tin plated for good conductivity and avoid oxidation of copper - Annealed material optimizes material and crimping properties - For heavy duty application - Good heat dissipation
	Circuit Braker Narrow Palm Cable Lugs	Electrolytic Copper	35 mm ² to 300 mm ²	6.5 mm to 10.5 mm		<ul style="list-style-type: none"> - Tin plated for good conductivity and avoid oxidation of copper - Annealed material optimizes material and crimping properties - Ensures immediate and easy installation of wires
	Long Barrel Cable Lugs	Electrolytic Copper	16 mm ² to 630 mm ²	8.4 mm to 21 mm		<ul style="list-style-type: none"> - Longer length barrel permits extra crimps - Seamless, one piece, copper construction with tin plating assures maximum conductivity.
	DIN 46235 Cable Lugs	Electrolytic Copper	6 mm ² to 1000 mm ²	5.3 mm to 21 mm		<ul style="list-style-type: none"> - Enclosed barrel prevent corrosion material from entering barrel when used in harsh environment
	Single Hole Cable Lugs	Electrolytic Copper	25 mm ² to 630 mm ²	6.5 mm to 21 mm		<ul style="list-style-type: none"> - HV lugs designed to withstand high voltage applications - Manufactured from high quality copper tube, annealed and tin plated
	Two Hole High Voltage Cable Lugs	Electrolytic Copper	25 mm ² to 630 mm ²	6.5 mm to 21 mm		<ul style="list-style-type: none"> - Best suited in application where two bolts are needed to avoid rotation - Heavy duty industrial application
	Tubular Cable Lugs - 45° Angle	Electrolytic Copper	6 mm ² to 400 mm ²	8.4 mm to 21 mm		<ul style="list-style-type: none"> - Electro Tinned Plated

Cable Lugs

	Type	Material	Cable mm ²	Stud Hole Size	Certification	Features
	Tubular Cable Lugs – 90° Angle	Electrolytic Copper	6 mm ² to 150 mm ²	4.2 mm to 21 mm	-	- Electro Tinned Plated
	Standard Aluminium Cable Lugs	Aluminium Alloy	16 mm ² to 300 mm ²	8 mm to 14 mm	-	- Made up of 99.5 % pure Aluminum - Popular choice in power distribution
	Aluminium Lugs for XLPE Cables	Aluminium Alloy	25 mm ² to 1000 mm ²	8 mm to 20 mm	-	- Made up of 99.5 % pure Aluminum - Popular choice in power distribution
	DIN 46329 Aluminium Cable Lugs	Aluminium Alloy	25 mm ² to 500 mm ²	8 mm to 20 mm	-	- Lugs as per DIN 46329 Standard
	DIN 46267 Cable Connectors	Electrolytic Copper	6 mm ² to 1000 mm ²			- Prevent over insertion of conductor
	Short Barrel Cable Connectors	Electrolytic Copper	1.5 mm ² to 1000 mm ²			- For limited space applications - Center Stopper to prevent over insertion of conductor
	Long Barrel Cable Connectors	Electrolytic Copper	1.5 mm ² to 1000 mm ²			- For better Pull Out Strength - Center Stopper to prevent over insertion of conductor
	Reducing Links Connectors	Electrolytic Copper	6 mm ² to 300 mm ²			- Minimum space Requirement - Seamless construction with tin plating assures maximum conductivity
	Aluminium Through Connectors	Aluminium Alloy	16 mm ² to 300 mm ²			- Aluminum Conductor - Internal wire stop to prevent over insertion of conductor

Clamping Solutions

XINDUX® offers a comprehensive range of high-quality cable ties with best-in-class tensile strength and endurance. The cable ties are offered in different materials like stainless steel, nylon, with and without coating and with different types of locking mechanism like ball lock, Ladder type and releasable.

These products have been used in road signages, junction box mounting onto the poles, street light pole identifications, various types of cable bundling etc. Along with these we also offer Bands (Straps), Buckles (Clips) as well as identification and marking tools which have high superior corrosive resistance and are used in marine, salt water and chemical environments.

Cable Ties

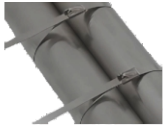

Bands and Buckles

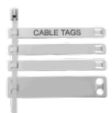

Identification & Marking Tools

Cable Ties

	Type	Material	Width	Thickness	Length	Technical Specification
	Ball Lock Cable Ties - Uncoated	SS316, SS304	4.6 mm (0.18 in) 7.9 mm (0.31 in) 12.7 mm (0.50 in) 16.0 mm (0.63 in)	0.25 mm (0.01 in) / 0.40 mm (0.02 in)	100 mm to 1000 mm (4 in to 39 in)	Temp: -60°C to +300°C Surface Finish : Metallic Multicolor : Available Rating : Comply to UL94 fireproof, Halogen free and UV-resistant
	Ball Lock Cable Ties - Coated	SS316, SS304	4.6 mm (0.18 in) 7.9 mm (0.31 in) 12.7 mm (0.50 in) 16.0 mm (0.63 in)	0.25 mm (0.01 in) / 0.40 mm (0.02 in)	100 mm to 1000 mm (4 in to 39 in)	Temp: -60°C to +300°C Surface Finish : Pure Polyester and Epoxy Coating Multicolor : Available Rating : Comply to UL94 fireproof, Halogen free and UV-resistant
	Ball Lock Spring Type Cable Ties - Uncoated	SS316, SS304	4.6 mm (0.18 in) 7.9 mm (0.31 in) 12.7 mm (0.50 in) 16.0 mm (0.63 in)	0.25 mm (0.01 in) / 0.40 mm (0.02 in)	100 mm to 1000 mm (4 in to 39 in)	Temp: -60°C to +300°C Surface Finish : Metallic Multicolor : Available Rating : Comply to UL94 fireproof, Halogen free and UV-resistant
	Ball Lock Spring Type Cable Ties - Coated	SS316, SS304	4.6 mm (0.18 in) 7.9 mm (0.31 in) 12.7 mm (0.50 in) 16.0 mm (0.63 in)	0.25 mm (0.01 in) / 0.40 mm (0.02 in)	100 mm to 1000 mm (4 in to 39 in)	Temp: -60°C to +300°C Surface Finish : Pure Polyester and Epoxy Coating Multicolor : Available Rating : Comply to UL94 fireproof, Halogen free and UV-resistant
	Releasable Type Cable Ties - Uncoated & Coated	SS316, SS304	6.35 mm (0.25 in) 9.53 mm (0.38 in)	0.50 mm (0.02 in) / 0.90 mm (0.35 in)	152 mm to 914 mm (6 in to 36 in)	Temp: -60°C to +300°C Surface Finish : Metallic, Pure Polyester (Coated), PPA (Coated) Rating : Comply to UL94 fireproof, Halogen free and UV-resistant
	Ladder Type Cable Ties - Coated & Uncoated	SS316, SS304	7 mm (0.28 in) 12 mm (0.47 in)	0.30 mm (0.012 in)	150 mm to 1000 mm (6 in to 39 in)	Temp: -60°C to +300°C Surface Finish : Metallic, Pure Polyester (Coated) Rating : Comply to UL94 fireproof, Halogen free and UV-resistant

Identification & Marking Tools

	Type	Material	Width	Length	Specification
	Carrier strips (coated & uncoated)	SS316	8 mm (0.33 in)	92.5 mm to 252.5 mm (3.67 in to 10 in)	No. of Alphanumeric Characters: 7 to 26 Package Quantity: 100 / box
	Alphanumeric characters	SS316	Standard		Complete range of individual letters, numbers, and symbols Easy to read in dim light and inaccessible places Fastened with variety of cable ties
	Marker plates & Tags	SS316	7 mm to 38 mm (0.29 in to 1.5 in)	100 mm to 1000 mm (4 in to 39 in)	Single / Three / Five line - Multiple Characters Character Height Option - 3mm & 4mm Laser Etching & Embossing Available

Bands and Buckles

Type	Material	Width	Thickness	Length	Notes
Bands for corrosive atmospheric applications	SS316, SS304	6.5 mm (0.25 in) to 19 mm (0.75 in)	0.50 mm (0.02 in) / 0.75 mm (0.03 in)	30.5 m (100 ft) / 61 m (200 ft)	Superior corrosion resistance in industrial, chemical and marine atmospheres Available in 4 color codes Carton box packing also available
Regular Bands High Tensile Application	SS201	6.5 mm (0.25 in) to 19 mm (0.75 in)	0.50 mm (0.02 in) / 0.75 mm (0.03 in)	30.5 m (100 ft) / 61 m (200 ft)	Available in 4 color codes Carton box packing also available
Regular Bands - Economical Value Application	SS430	6.5 mm (0.25 in) to 19 mm (0.75 in)	0.50 mm (0.02 in) / 0.75 mm (0.03 in)	30.5 m (100 ft) / 61 m (200 ft)	Available in 4 color codes Carton box packing also available
Utility Bands	SS201, SS304, SS316, SS430	10 mm (0.4 in) to 20 mm (0.8 in)	0.40 mm (0.016 in) / 0.75 mm (0.03 in)	30 m (98.5 ft) / 50 m (164 ft)	Specially packed for industrial and utilities requirement Packed in plastic dispensers and Cartons Boxes
Aluminium Perforated Strip	Aluminium	19 mm (0.75 in)	1.20 mm (0.047 in)	10 m (33 ft) / 25 m (82.5 ft)	Easy to install for light duty applications Perforated band with evenly spaced holes & slots enables fastening with nut & bolt, screw or cable tie Uncoated & Polyester color coated bands available
Heavy Duty Bands	SS201, SS304, SS316, SS430	19 mm (0.75 in) to 32 mm (1.25 in)	1.10 mm (0.04 in)	30.5 m (100 ft)	Bands for heavy duty industrial applications Bands available in all grades of stainless steel Packing in carton boxes
PVC Coated Bands	SS315, SS316	12.7 mm (0.5 in) to 16 mm (0.63 in)	1.10 mm (0.04 in)	20 m (66 ft)	PVC has excellent chemical and mechanical properties making it a very effective medium of coating on SS 316 Suitable Buckles / Clips and Tools are also supplied as a total solution
PPA 571 Coated Bands for Highly Corrosive Applications	SS304, SS316	6.5 mm (0.25 in) to 19 mm (0.75 in)	1.10 mm (0.04 in)	25 m (82.5 ft)	Corrosion Resistance in harsh offshore environments Excellent for Marine Application Better cable bunding through superior tensile strengths
All Purpose PPA 571 Coated Bands	GCS, SS304, SS316	12.7 mm (0.5 in) to 19 mm (0.75 in)	0.75 mm (0.03 in)	3 m (9.9 ft) / 10 m (33 ft)	Corrosion Resistance Excellent for Marine Application Better cable bunding through superior tensile strengths
All Purpose Uncoated Bands	GCS, SS304, SS316	12.7 mm (0.5 in) to 19 mm (0.75 in)	0.75 mm (0.03 in)	3 m (9.9 ft) / 10 m (33 ft)	
Jaw Type - Precut Strap	SS201	12.7 mm (0.5 in) to 19 mm (0.75 in)	0.76 mm (0.03 in)	51 cm (20 in) to 229 cm (90 in)	Ready to use pre-cut band Time saving & cost effective solution Enables faster installation Available with coating in Epoxy / Pure Polyester
Wing Type - Precut Strap	SS201	6.5 mm (0.25 in) to 19 mm (0.75 in)	0.50 mm (0.02 in) / 0.75 mm (0.03 in)	25 cm (10 in) to 175 mm (69 in)	Ready to use pre-cut band Time saving & cost effective solution Enables faster installation Available with coating in Epoxy / Pure Polyester
